Agenda

- Introduction and session objectives
- Concept check quiz
- Case study walkthrough and guided hands-on coding using a prompt-based approach
- Deriving business recommendations from the analysis
- Live Q&A and session wrap-up

Learning Objective

- **Understand how reasoning is integrated into agentic systems** by implementing the ReAct framework along with tool usage to decide when and how to invoke tools during task execution.
- **Learn how planning is used in an AI agent workflow** to structure a multi-step breakdown of tasks to perform before and during execution.
- **Implement an Agentic AI workflow** in Python by building a LangGraph-based pipeline that combines planning, reasoning, and tool usage to execute end-to-end tasks reliably.

Session Structure

Duration	Topic	Details
5 Min	Session Structure	• Get a brief on the learning objectives and what you'll achieve by the end of the session.
20 min	Concepts covered in the videos of the week	• Revisit the key concepts from the weekly videos through live discussion and questions. You'll be asked to share your thoughts, answers, and reflect on what you understood. • ***Tip:*** Be proactive - try answering the questions even if unsure. Bring up any doubts or unclear points from the videos. This is your chance to clarify concepts and solidify your understanding with the help of peers and the mentor.
80 min	Hands-on Case Study	• You'll work through a practical case study. The mentor will explain the business problem, walk through the data, and demonstrate how to approach it. • ***Tip:*** Participate actively - take notes, and don't hesitate to ask

10 min	Extended Doubt Clearing and Industry Perspective	• An open Q&A where you can ask questions about the case study or anything from the week's content. The mentor will also share real-world examples to show how the concepts are used in the industry. • ***Tip:*** Make sure you come prepared with your questions. When asking questions, be considerate of everyone's time. Collaboration and teamwork are essential for making the session successful, so actively engage and work together with your peers.
5 min	Session Summary	• A quick summary of the key takeaways from the session, including a recap of the most important concepts and steps practiced. • ***Tip:*** Use this time to reflect: What clicked for you? What still feels unclear? Jot down follow-up actions or topics to review after the session.

Important Points to Note

- Log in for your session 5 min before and make sure you are ready with all the material to be used for the session.
- Be well prepared for the session, and ensure to thoroughly go through the concepts covered in the week's videos before the session. (It renders the Mentored Learning session of no use if we are no completely prepared.)

Power Ahead!
