we explore recent breakthroughs in reasoning (DeepSeek!) as well as main planning techniques that enable precision and adaptability

- Brief History Overview
- Understanding AI Reasoning
- Recent Breakthroughs in Reasoning
  - Chain-of-Thought Prompting
  - Self-Reflection and Self-Consistency
  - Few-Shot and In-Context Learning
  - Neuro-Symbolic Approaches
- Reasoning is Impossible Without Planning
- Main Planning Techniques for Precision and Adaptability
  - Classical AI Planning (Deliberative Planning)
  - Reinforcement Learning (Learning to Plan via Rewards)
  - How DeepSeek Uses Reinforcement Learning (RL) to Improve Reasoning
  - Hierarchical Planning (Tiered Strategies)
- Concluding Thoughts
- Resources
  - Sources from Turing Post

Last week, we explored whether GenAI can truly reason, categorizing human thinking
