Business Applications with Agentic AI

Session Plan: Introduction to AI Agents

Agenda

- Introduction and session objectives
- Concept check quiz
- Case study walkthrough and guided hands-on coding using a prompt-based approach
- Deriving business recommendations from the analysis
- Live Q&A and session wrap-up

Learning Objective

- **Understand and analyse a real-world problem** by comparing an LLM-only approach with an agentic workflow for analytics and seeing how a structured, node-based flow supports more dependable outputs.
- Learn to apply an agentic approach by outlining the steps to move from an LLM-only setup to an agent workflow and understanding what changes in the workflow.
- Implement an Agentic AI workflow in Python by deploying an agentic Workflow using Langraph, then evaluate the response and get the score to compare results.

Session Structure

Duration Topic		Details
5 Min	Session Structure	• Get a brief on the learning objectives and what you'll achieve by the end of the session.
25 min	Concepts covered in the videos of the week	• Revisit the key concepts from the weekly videos through live discussion and questions. You'll be asked to share your thoughts, answers, and reflect on what you understood. • Tip: Be proactive - try answering the questions even if unsure. Bring up any doubts or unclear points from the videos. This is your chance to clarify concepts and solidify your understanding with the help of peers and the mentor.
75 min	Hands-on Case Study	• You'll work through a practical case study. The mentor will explain the business problem, walk through the data, and demonstrate how to approach it. • Tip: Participate actively - take notes, and don't hesitate to ask relevant questions. This is where concepts become real through application.
10 min	Extended Clearing Industry Perspective	• An open Q&A where you can ask questions about the case study or anything from the week's content. The mentor will also share real-world examples to show how the concepts are used in the industry. • Tip: Make sure you come prepared with your questions. When asking questions, be considerate of everyone's time. Collaboration and teamwork are essential for making the session successful, so actively engage and work together with your peers.
5 min	Session Summary	• A quick summary of the key takeaways from the session, including a recap of the most important concepts and steps practiced. • Tip: Use this time to reflect: What clicked for you? What still feels unclear? Jot down follow-up actions or topics to review after the session.

Important Points to Note

- Log in for your session 5 min before and make sure you are ready with all the material to be used for the session.
- Be well prepared for the session, and ensure to thoroughly go through the concepts covered in the week's videos before the session. (It renders the Mentored Learning session of no use if we are not completely prepared.)

Power Ahead!
