1. Can't open the ".ipynb" file because no app is associated with it.

This error message is displayed when the PC can't find an app associated with the ".ipynb" file to open it. These files cannot be opened directly by double-clicking on them and have to be opened using specific software/web links.

The steps involved in opening a .ipynb file using Google Colab are mentioned below.

Note: As Colab implicitly uses Google Drive for storing your notebooks, ensure that you are logged in to your Google account before proceeding further.

Step 1: Open the following URL in your browser

https://colab.research.google.com/?utm_source=scs-index

Your browser would display the following screen (assuming that you are logged into your Google account):

Step 2 - Select the "UPLOAD" option (it allows us to upload files from our local directory) and in the dialog box that pops up, go to the folder where the file has been downloaded (usually Downloads) and double click on the file name to open it.

We can also create a new Python notebook (.ipynb file) by selecting the "NEW
